

Cologix Access Marketplace

Virtual connections to fast track enterprise connectivity

If your enterprise need reliable, scalable, high-performing cloud connectivity there's a faster way to get it. Access Marketplace lets you establish virtual connections to all major cloud service providers (CSPs) and local and regional service providers over a single connection.

1 Provision connectivity any time, any day

Provision end-to-end, Layer 2 circuits when and where you need them – any time, any day. The easy-to-use Access Marketplace self-service portal lets you add cloud providers at will.

2 Scale as needed

Reduce CAPEX/NETEX by scaling your network connections to support business needs.

3 Simple, easy-to-use interface

Manage multiple connections and bandwidth from a single screen.

4 Maintain control

Manage speed and connections through the Access Marketplace portal.

5 Increased data security

Avoid the cybersecurity risks public internet connectivity presents. Your virtual connection with Access Marketplace delivers a far more secure and reliable connection than simple internet connectivity.

6 Lower costs

Access Marketplace enables you to optimize bandwidth to support your required data transfer with the CSPs.

7 Improve performance

Your hosted, multitenant network exchange through Access Marketplace enables you to avoid the congestion and bottlenecks of public internet access. Access Marketplace delivers consistent performance with speeds up to 10Gbps over each virtual circuit you configure..

With Access Marketplace, get cloud access in minutes

Cologix Access Marketplace

How Cologix Access Marketplace works

Access Marketplace is a Layer 2 connection available to any Cologix customer with a presence in a Cologix data center.

The network exchange solution starts with one or more cloud connect ports. On them, you can configure Ethernet Virtual Circuits (EVCs) and attach each EVC to your choice of CSPs with data transfer speeds up to 10Gbps.

All of this takes place on an easy-to-use, fully automated, on-demand and self-service portal that lets you tailor secure connectivity to one or multiple cloud providers in minutes.

1

Manage your multicloud strategy with ease

One port supports multiple cloud connections. Isolate various organizations, projects, customers and workloads on separate EVCs. Connect from one colocation site to multiple cloud regions for enhanced availability.

2

Provision as needed and scale with ease

Access Marketplace makes it easy to connect with Amazon Web Services® Direct Connect, Google Cloud Interconnect, Microsoft® Azure ExpressRoute, IBM Cloud™ and Oracle® FastConnect through direct onramps.

3

Cloud access is easy and fast

Cologix orchestrates all the requirements of each CSP partnership, so you don't have to. Eliminate the hassle of licensing, certifications and more. All you need to do is log onto the Cologix Access Marketplace portal and connect with a few clicks.

Cloud Connect Components

Sold on a Port + Ethernet Virtual Circuit (EVC) basis	
Ports	
1Gb Port	10Gb Port
Redundant 1Gb Ports	Redundant 10Gb Ports
EVCs	
Cloud Connect EVC	Extended Cloud EVC
Cloud Connect Redundant EVC	Extended Cloud Redundant EVC
EVC Speed Options	
50Mbps, 100Mbps, 200Mbps, 300Mbps, 400Mbps, 500Mbps, 1Gbps, 2Gbps, 5Gbps, 10Gbps	

Gain speedy access · Provisioning control · Scalable, flexible multicloud solution
